

MRET : Molecular Resonance Effect Technology

A patented technology that changes the bond angle of **H2O from 104.5° to 114.5°** enabling optimal absorption.

It improves nutrient transport and assimilation,
as well as detoxification of the body.

MRET Benefits

- Helps hydrate three times faster than inactivated water*
- Assists in optimal absorption*
- Assists the body in balancing pH-levels*
- Helps normalize the circulatory system*
- Supports vital biofield communication*
- Helps the body's natural detoxification process*
- Supports optimization of nutrient and vitamin availability to your body
- Supports powerful antioxidant effects*

ENHANCED HYDRATION

Changing of the molecular bonding angle of H2O makes it 3-6 times easier for our body to absorb.

Improved Metabolism

Heightened intracellular functions means that our body can detox, regenerate, and recover faster.

Enhanced Morphology

Creation of cells, especially red blood cells, happens at a more efficient and perfected manner.

Decreased Aging

As cell regeneration rate increases, it is only natural that the process of aging becomes slower.

Increased Immunity

Better transportation of nutrients with efficient extermination of wastes means a healthier body.

Healthier Skin

Wrinkles disappear as skin cells regenerate faster, leading to more elastic and glowing skin.

Improved Detox

Bodily waste products get carted away faster, leading to cleaner and more efficient internal systems.

Improved Vitality

A harmonious body affords you deeper sleeps, clearer thinking, and higher energy levels.

It is perhaps ironic that the devastating tragedy of Chernobyl led to the discovery of life-enhancing MRET technology.

Following the disaster at Chernobyl power plant the scientist Igor Smirnov, Ph.D. with his investigative team studied the beneficial health effects of mountain spring waters on people suffering from radiation diseases.

They found out that **one group of patients undergoing the rehabilitation in the health care facility in the area of mountain springs had significant health improvement** although thousands of others did not have good results. Dr. Smirnov studied the spring water in this area and **finally found out that this spring water had specific long-range dynamic molecular structuring.**

This was the seed from which sprouted one of the most innovative *Molecular Resonance Effect technology* developed by Igor Smirnov, Ph.D. Since 1990 in the USA Dr. Smirnov conducted extensive research and in 2000 was awarded with the US patent "Method and Device for Producing Activated Liquids and Method of Use thereof."

MRET is a *proven* and *patented* system that alters the Molecular Structure of Water using a non-contact, non-chemical and bio-safe method.

In clinical trials, mice who were fed the MRET water experienced half the amount of cancer seen in a control group, and lived a 70 percent longer life span.

"We are not making any dramatic cures; we are allowing the body to do what the body does best given a more optimal condition."

-- Dr. Howard Fisher
